Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim s 16, 1-15, 17, 20 in part , drawn to compounds and pharmaceutical compositions , wherein $n=0$, $r=1$, Ar is aryl, R4 is an aryl and Y is $(CR_2R_3)_p$ CO-NH , R1 is as given in the compounds of claim 16, classified in class 546, 514, subclass 18 , 278.
- II. Claims 1-15, 17, 20 drawn to compounds and pharmaceutical compositions wherein n, r, Ar, Y and R1 are different from the group I, classified in various classes and subclasses. A further election of a single disclosed species is required. May be subject to further restriction.
- III. Claim 18, 19, 21, 22-26 , drawn to various methods of treating, classified in class 514 and various subclasses. This group if elected may be subject to restriction .

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have a different core . Even the spiro rings are not the common core. Thus these groups have a different bonding and have different modes of operation. Applicants compounds are pharmaceuticals and compounds act on certain receptor cites in a lock and key mechanism and hence the structure and bonding is a critical aspect of the invention. Thus the inventions are unrelated.

Art Unit: 1625

Inventions I, II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case there are numerous drugs which are on the market to treat obesity, diabetes and such the process of using the product as claimed can be practiced by another product.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. William Lee on 5/27/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1625

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicants preserve their right to file a divisional on the canceled non-elected claims without prejudice, in due course.

Rejoinder:-

If applicants elect Group I or II and if it is found to be allowable then ONE method of treating, limited to the same scope of the compounds will be rejoined with the compound claims.

If applicant's traverse on the grounds that the inventions are not patentably distinct, applicants should submit evidence or identify such evidence now of record showing the groups to be obvious variants or clearly admit on the record that this is the case. In either instance if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 USC 103 of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rita J. Desai whose telephone number is 571-272-0684. The examiner can normally be reached on Monday - Friday, 9:30 am to 6:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph McKane can be reached on 571-272-0699. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
